

ISA nextgenmaterials

SPRING SUMMER 2027

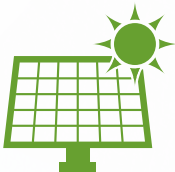

GLOBAL FOOTWEAR COLLECTION

ISA TanTec™, a business unit in ISA Group, manufactures **LITE** (Low Impact To the Environment) leather with our commitment to minimize negative environmental impacts. Sustainability is an important part of ISA group's identity. In 2003, ISA group developed the LITE concept which defines a high standard of environmental sustainability in the manufacturing process.

LITE Features

Bamboo Wall
Rarely seen in traditional tanneries, the use of bamboo walls naturally ventilates the entire production facility with a constant breeze of fresh air to save air condition in hot geographic area.

Solar System
We make use of renewable solar thermal energy to replace diesel fuel, which is traditionally used to heat up water for the tanning process. Approx. 65% of hot water is heated with solar energy.

Rain Lagoon
To limit the impact on the local communities, we minimize the usage of municipal water by the collection of rainwater for production and greenery. Approx. 25,000 m³ of rainwater is collected by our lagoon per year.

Wind Energy
We use wind energy to generate green energy which allows rainwater to be pumped from the lagoon into production.

Natural Light
Opaque light panels used in the ceiling of production floors to maximize the use of natural lighting during the day. During days without sunshine, LED light bulbs are used to illuminate the production floor. This saves more than approx. 2,600 production hours of lighting every year.

Wetland
Our engineered wetlands allow a natural purification process of our wastewater without generating emissions. Our treatment facilities are unique in the industry due to the amount of planning, innovation and investment involved. Each wetland is set up with an automated water level control system for optimal wastewater treatment.

Environmental Impact

Compare the energy and water savings of ISA products when choosing leathers for adoption. The choice you make can positively influence the impact to the environment!

Article	LITE Water Savings (L/SF)	LITE Energy Savings (MJ/SF)
Alaska	9.23	2.25
Conquest	9.22	2.44
Delfino	9.23	1.53
Flourite	9.58	2.71
Hunter	9.80	2.71
Kuromi WP	8.46	2.57
Mystic Two Tone	9.97	2.83
New Skylark	9.23	2.94
Outback WP	8.46	2.27
Purity	10.14	3.16
Rosana	10.12	2.78
Saddleback WP	8.36	2.66
Sellafix	9.93	2.62
Sequence	9.18	3.25

The numbers are showing the energy and water an article will save per square foot, comparing to the Bronze Rate (65%) in the latest LWG Protocol of 50.4 MJ/m² (4.68 MJ/sqf) for energy consumption and 134.1 L/m² (12.46 L/sqf) for water consumption.

LWG (Leather Working Group), a multi-stakeholder group, develops and maintains a protocol that assesses the compliance and environmental performance of tanners, promotes and appreciates environmental business practices within the leather industry.

LEATHER WORKING GROUP

ISA Responsible Hide Sourcing

LWG Silver/Gold Rated

To ensure the comprehensive impact of our hide supply chains, all incoming hides must adhere to the following fundamental requirements:

- 100% hides source from LWG Silver/Gold rated suppliers
- 100% of hides traceable back to the slaughterhouse

Internal Policy: ISA-III-101-07-E

Greener Pastures™

Enhanced traceability to birth farms with comprehensive animal welfare requirements:

- All hides are traceable by lots back to a specific group of farms or ranches through documented chain of custody processes, ensuring complete transparency
- All cattle are fed a vegetarian diet
- Comprehensive animal welfare practices are implemented
- USDA Humane Handling program protocol is adhered to

Internal Policy: ISA-III-204-02-E

Greener Pastures™ Deforestation and Conversion Free

Complies with EUDR requirements, including providing geolocation coordinates and polygons from the birth farm and fattening farms for direct and indirect suppliers:

- Ensures that all hides originate from farms or ranches with documented chain of custody practices and third-party verifications of deforestation free
- Both Uruguay (MOGP) and Brazil (MDCF) hides meet these requirements

Internal Policy: ISA-III-204-02-E

Regenerative Hides

Support regenerative agricultural practices that restore degraded soils, enhance biodiversity, and water retention, and have a net positive impact:

- Ensures all hides are traceable back to birth farms or ranches with comprehensive chain of custody documentation
- Adhere to the GRASS (The Generalized Regenerative Agriculture Sourcing Specification) Protocol
- Prioritize soil health, biodiversity protection, and maintaining vegetative cover
- Implement organic carbon sequestration practices
- The minimum animal welfare requirements are those established by the American Grassfed Association (AGA) Grassfed Ruminant Standard or those used in Audubon's Conservation Ranching Protocol and align with industry standards

Internal Policy: ISA-III-204-01-E

WHY CHOOSE LEATHER FROM ISA ?

We know you have countless choices for your leather sourcing needs. We always appreciate your partnership and below are just a few of the advantages you get by sourcing your leather from ISA.

SEASONAL COLOR

	Grape Jam 18-3415 TPG 144-40-13
	Pheasant 16-1332 TPG 022-57-20
	Storm Blue 17-4716 TPG 102-47-13
	Marsala 18-1438 TPG 012-41-18
	Dusty Blue 16-4010 TPG 118-64-07
	Bright Gold 16-0947 TPG 035-65-24

CORE COLOR

Alaska

PRODUCT FEATURES: ALASKA is a white wax leather designed to be brushed off, revealing beautiful color while maintaining a soft, hazy finish. With its soft hand, it's ideal for spring mocs and athletic-inspired styles.

AUBURN LEATHER LACE

Leather laces are rich in texture & feel, timeless heritage, lasting tradition, and encompass the overall essence of natural quality. Using leather footwear lace is a proven value-add to any footwear design.

Environmental Impact of Auburn Leather Lace:

One Pair of Laces (0.13 sqft per pair)	=	1.36 Liters of Water Saved	+	0.50 MJ of Energy Saved
---	---	--------------------------------------	---	-----------------------------------

The numbers are showing the energy and water an article will save to make one pair of laces (0.13 sqft of leather), comparing to the Bronze Rate (65%) in the latest LWG Protocol of 50.4 MJ/m² (4.68 MJ/sqft) for energy consumption and 134.1 L/m² (12.46 L/sqft) for water consumption.
