Our trademarked LITE manufacturing process started in 2003 with a vision to offer environmentally friendly leather to our brands. LITE provides customers with carbon, water and energy usage for each of our leather creations. These numbers are proven and the calculation methodology has been audited by EY (Ernst & Young).

ISA is diversified in many leather using industries

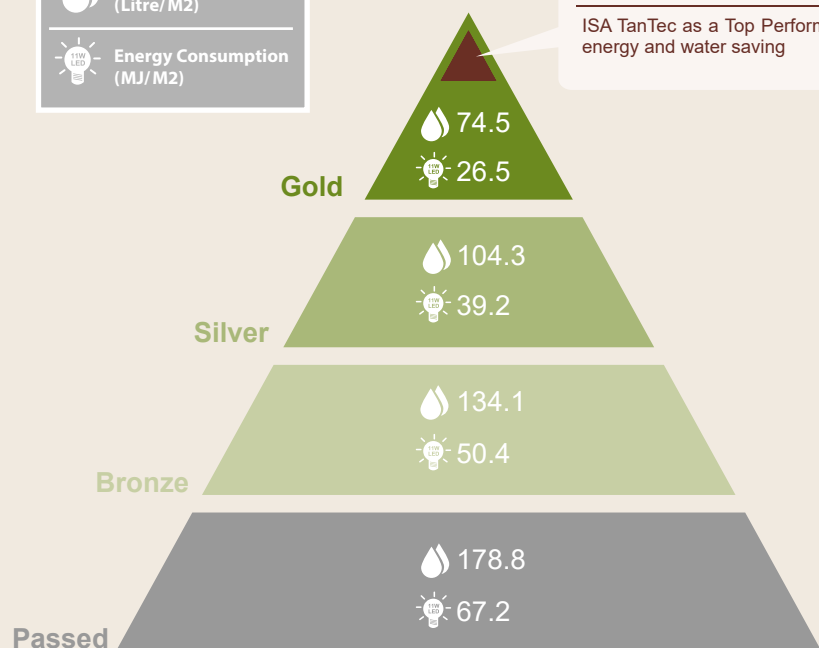

Our innovative approach brings added value to our customers.

Another reason why we are the “Brand behind the Brand”.

Where We Stand With LWG

Water Consumption (Litre/ M2)
Energy Consumption (MJ/ M2)

43.1 18.8
ISA TanTec as a Top Performer in energy and water saving

*The numbers are showing the benchmarks of the Leather Working Group Protocol 7.2.1 in different grades and our position regarding energy consumption and water consumption
